

MRF **Sorting Line** Conveyor Systems

Low Volume / Curbside (LVC).

- ▼ Competitively priced equivalent to other small sorting systems.
- ▼ Sorting lengths up to 40 ft.
- ▼ Two sliderbed (SB) conveyor system ideal for curbside container sorting.
- ▼ 5 ft. wide OSHA compliant platform on one side.
- ▼ 7 ft. clearance for a 4 cubic yard container.
- ▼ Variable speed controls.
- ▼ Available in above grade (AG) and below grade (BG) infeed configurations
- ▼ Magnetic separation package also available.

Medium Volume / Curbside (MVC).

- ▼ Medium Volume/ Curbside (MVC) is a moderately priced, versatile, sorting system for use with adjacent baling line.
- ▼ Features two heavy-duty sliderbed conveyors with magnetic separation.
- ▼ 5 ft. wide OSHA compliant platform on both sides of the conveyor line.
- ▼ 9 ft. clearance for loading equipment traffic.
- ▼ 25 ft. long binwalls.
- ▼ Variable speed controls.
- ▼ Available in above grade (AG) and below grade (BG) infeed configurations.

Kelowna (K2).

- ▼ High volume sorting line conveyor system.
- ▼ This system is a combination chainbelt feed conveyor and heavy-duty sliderbed sorting line conveyor(s). It can be used for OCC separation, mixed paper high grading, curbside container sorting, mixed waste sorting, and dirty MRFs.
- ▼ Sorting lengths up to 120 ft. for removing high value items from the waste stream.
- ▼ 5 ft. wide OSHA platform on both sides of the conveyor.
- ▼ 12 ft. clearance for loading equipment traffic.
- ▼ 30 ft. binwalls with gates.
- ▼ Variable speed controls.
- ▼ Also available with overhead magnetic separation.

Marathon XStream Series (MX).

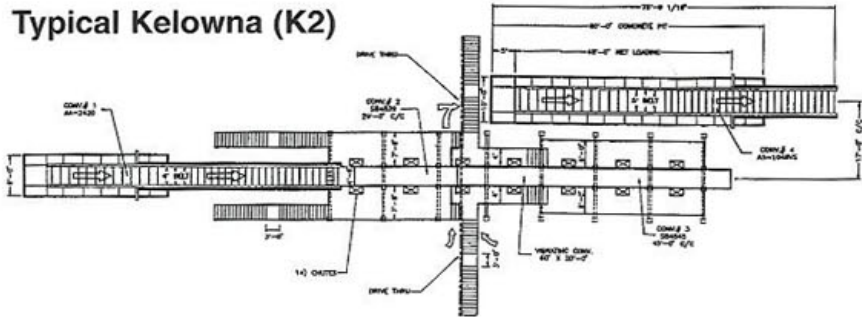

- ▼ Marathon Xstream Series (MX) is a custom engineered systems for handling MSW, C&D, and other high volume applications with high service factor materials such as transfer stations, landfill applications, rail transfer and dirty MRFs.
- ▼ Features a custom designed steel belt conveyor(s), grizzlies and vibrating conveyor options, various magnetic separation options, and offers engineering and architectural services.

Marathon Equipment is your single source for conveyors, waste handling, recycling and reduction equipment

MRF Sorting Line Conveyors

Typical Kelowna (K2)

Kelowna (K2) Sorting Line Conveyor System

- Up to 120 ft. sorting length
- 5 ft. wide platform (both sides)
- 12 ft. clearance
- 30 ft. binwalls with gates
- variable speed controls

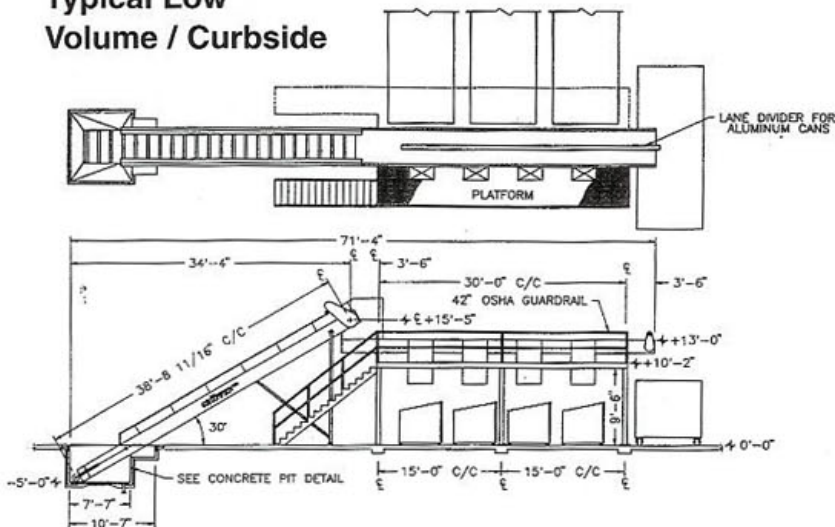

Marathon XStream Series Conveyor System

Custom engineered system

Medium Volume / Curbside (LVC) Conveyor System

- 5 ft. wide OSHA platform (both sides)
- 9 ft. clearance for loading equip.
- 25 ft. long binwalls
- variable speed controls

Typical Low Volume / Curbside

Low Volume / Curbside (LVC) Conveyor System

- Up to 40 ft. sorting length.
- 5 ft. wide OSHA platform (one side)
- 7 ft. clearance.

Marathon will equip your sorting line with grizzlies, vibrating belts and magnetic separators.

Marathon Equipment is your single source for conveyors, waste compaction systems, recycling equipment and reduction equipment!
